

Physio Inq Update on **Coronavirus Measures** for staff and clients

STAFF AND PATIENT HEALTH

We are implementing the following measures for the safety of our staff and clients:

- Contactless, infra-red body temperature testing will be in place for both clients and therapists prior to sessions.
- Washing of Hands and the use of Hand Sanitizer is mandatory before and after appointments
- Patients will be offered sanitizer for their own use
- Wiping of all surfaces with alcohol before and after use
- Patients who are at risk are asked to contact the office via telephone from which you are treated. At risk now includes Immuno-suppressed clients, the elderly, and those who have been in high risk areas or in contact with COVID-19 patients.

TELEHEALTH OFFERING

If anyone is unable to continue treatment for any reason, I am proud that we offer an amazing Telehealth service that will replicate treatment and rehab regimes. The platform is user friendly, and staff are well trained in how to effectively run their sessions on it. Check out your clinics website for more information.

DIFFICULT TIMES

It is an interesting time in our lives. We hope to minimise the contagion through these practices and to keep you safe and continue to deliver amazing care. I appreciate you continuing to work with us through this difficult time, our clinic owners & staff really appreciate it.

Yours In Health,

Jonathan Moody

CEO
